

ZOR-PAC™ SYSTEMS
VCI PAPER
PRODUCT INFORMATION

PRODUCT DESCRIPTION:

Zor-Pac™ VCI Paper is designed to inhibit rust and corrosion. The VCI chemical impregnated into the paper, vaporizes from the paper, dissolving in any moisture that has condensed on the metals surface, rendering the moisture non-corrosive

PRODUCT APPLICATIONS:

- Packaging of overseas shipments
- Storage of raw materials or finished parts
- Steel mills or foundries
- Wherever the presence of condensation exists

FEATURES & BENEFITS:

- MPI product for use with all metals and alloys
- Provides protection to areas of items where an application of a grease or oil preservative would be impossible
- Eliminates complicated cleaning and preserving operations associated with grease and oil type preservatives
- When protected by Zor-Pac™ VCI paper, essential stored items are ready for immediate use whenever needed.

PHYSICAL DATA:

Appearance..... Woven poly fabric laminated to Kraft paper
Texture..... Pleasant
Consult Material Safety Data Sheet for detailed information

SAFETY & HANDLING:

Consult Materials Safety Data Sheet for detailed information

FIRST AID:

Consult Material Safety Data Sheet for detailed information

STORAGE:

Store indoors on roll, in a cool dry place, away from excessive heat

DISPOSAL:

Dispose in compliance with federal, state, and local regulations

PACKAGING:

Roll – 6' Wide x 600' Long
